

GENERAL BRAVO INSTRUCTIONS

1. Patient to bring back both black recorder and completed log sheet to Huron Gastro Office after 48 hours of reading.
2. Patient to expect the pH capsule to fall off and be released from the body within 7-10 days from the procedure.
3. Patient may resume normal daily activities and to resume normal diet once feeling better from sedation after the procedure.
4. Do not turn Bravo recorder off at any time.
5. Patient needs to have Bravo recorder close by at all times, at least be within 3 feet of the recorder.
6. Remain in PPI (acid reducer medication) unless otherwise directed.
7. Any questions, call Huron Gastro Office at 734-434-6262, ask to speak with a nurse.
